FOR IMMEDIATE RELEASE

Prism Clinical Imaging joins Siemens Healthineers Digital Ecosystem
Clinical workflow for brain mapping to be available

Milwaukee, Wisconsin – November 25, 2018 – Prism Clinical Imaging, Inc., developer of advanced medical imaging software, has announced its partnership with Siemens Healthineers to deliver Prism's brain mapping capabilities through the digital marketplace from Siemens Healthineers.

The technique of functional magnetic resonance imaging (fMRI) is regularly combined with diffusion MRI and other perfusion and metabolic imaging in pretreatment brain mapping for tumor and epilepsy patients. The same techniques are also used in diagnosis and treatment planning for a variety of other neurological disorders. Prism combines multi-parameter and multi-modality imaging for treatment planning and follow-up in an FDA cleared, professionally-supported product suite.

The power of the Prism workflow will be available to clinicians through the cloud-based applications Prism Serve® (image processing service) and Prism View® (clinical visualization, analysis and reporting) connected with the secured environment of teamplay[1] cloud platform. The Siemens Healthineers Digital Ecosystem was introduced to support and foster the possibilities and opportunities that reside in healthcare data helping all stakeholders in healthcare to develop towards value based care.

The Prism Brain Mapping application will be available for demonstration at RSNA 2018 (Chicago, IL) in the Siemens Healthineers Booth, South Hall #4136.

About Prism Clinical Imaging, Inc.:

Prism Clinical Imaging, Inc. is the leader in the field of clinical functional MRI (fMRI) and advanced neuroimaging. Prism software provides physicians with multi-modality, multi-parameter imaging for treatment planning and image guided treatment delivery. Intuitively organizing multiple series of anatomical, functional and physiological images

in decks, the software allows for more effective clinical interpretation since the images are already registered for the physician. The power of Prism is also available on a per-case basis through its Prism Serve® processing service. Prism helps physicians deliver high-quality and safe treatment to patients, while optimizing clinical workflow. Located near Milwaukee, Wisconsin, Prism was founded by clinical professionals at the Medical College of Wisconsin. For more information, visit the Prism Clinical Imaging web site: www.prismclinical.com.

About the Siemens Healthineers Digital Ecosystem:

The Siemens Healthineers Digital Ecosystem[2] provides an open and secured environment for digitalizing healthcare. It effectively integrates and interconnects data and knowledge from a global and diverse network of healthcare stakeholders. Digital offerings developed by Siemens Healthineers and its partners will help to increase decision making capabilities based on data-driven insights. A dedicated marketplace for digital offerings from Siemens Healthineers and its partners will allow users to quickly assess the different offerings and the use cases they serve. It supports healthcare institutions to efficiently purchase and deploy digital health offerings within their setting. For more information, visit www.siemens.com/healthineers-digital-ecosystem.

1-) teamplay is not commercially available in all countries. If the services are not marketed in countries due to regulatory or other reasons, the service offering cannot be guaranteed.

 2-)The Siemens Healthineers Digital Ecosystem is available for piloting partners in the U.S. and EU only. If the services are not marketed in countries due to regulatory or other reasons, this service offering cannot be guaranteed.
